North Frontenac COVID-19 Update

Thursday April 30, 2020

Kingston Frontenac Lennox & Addington (KFL&A) continues to have a lower than average number of COVID-19 cases. KFL&A reports 59 total cases with 56 recovered and only 3 active cases. This is largely due to self-isolation and physical distancing success but we cannot get complacent. For daily updates please go to the following website <https://www.kflaph.ca/en/healthy-living/status-of-cases-in-kfla.aspx>

The KFL&A area peaked in relation to COVID-19 around April 1st. Ontario as a whole has just peaked as of this week.

The Province has developed a framework, including a roadmap to economic recovery. This will be a three phased approach with the following four (4) key criteria needed to be in place before Phase One is implemented.

1. Virus spread and control is in place
2. Health system capacity in place
3. Public Health capacity in place
4. Virus incident tracking in place

There is no date set yet to start Phase One at this time.

This is all positive news but we cannot relax just yet and we need to continue to self-isolate and physical distancing to ensure this virus is under control.

The Township would like to thank you all for your cooperation and dedication to keep our community safe.

For detailed information on COVID-19 please review our [Reference Sheet](#) or check our [website](#), frequently for future updates, as things change rapidly.
