**Subject:** RE: KLA's Submission - Kashwakamak Lake Dam Environmental Assessment

Hello Sue,

Thank you for submitting the Kashwakamak Lake Association (KLA) formal comments pertaining to the Kashwakamak Lake Dam Environmental Assessment. MVCA and MP will ensure we take into consideration KLA three priorities as we progress through the Environmental Assessment process.

We are currently in the early stages of this assignment and are in the process of completing preliminary studies and investigations. As the project progress, additional information will be posted on the MVCA web page for viewing, as well as other opportunities to provide comments.

We have added the contacts provided in your response letter to our project contact list and will keep you updated as the project progresses. All parties will be notified of future milestone events including the Notice of Public Information Centre and Notice of Study Completion.

We would like to thank KLA for their assistance on continuing to share and post notices and in identifying others cottagers/property owners interested in receiving direct communications on this study.

Thank you,

**Lisa Marshall, P.Eng.**

**Manager, Environmental Engineering**
